

PANDORA

Cash Management Systems to
compliment the Departments EMS
system

Pandora will provide venues with a cash management tool to manage floats on a daily basis and complete hopper reconciliations on a daily and/or weekly basis.

Pandora downloads the machine meter readings straight from the site controller using the departments designed EMA file.

Pandora contains a simplistic way to complete a GMA

Pandora data forms are compliant DIA forms (e.g. Cash Clearance Details report, Daily Jackpot Cancelled Credit Report, Cancelled Credit and Refill Report, Unpaid Prize Report, Gambling Equipment and Player Fault Report and a Key Register), they are linked back to the Pandora's Cash Management programme machine names, serial numbers, opening readings etc and preloaded.

**FROM only \$1.50 per
day Plus GST**

Support options available from \$1.50
per venue per day plus GST

PANDORA Cash Management System to compliment EMS

**Protect your venues
cash**

**ABOUT SALAMANDER
SYSTEMS LTD**

Salamander Systems Limited (the one-stop-shop) was formed to provide systems and training solutions for the gaming and related industries

Essentially we develop and provide software systems or services to replace time-consuming and paper-intensive manual systems. These tools are designed to make our customers' life easier and their business more profitable.

The Management team of Salamander Systems has more than 80 years of collective work experience in the hospitality industry. The team has had extensive experience in the gaming industry as both venue operators and Club/Corporate Societies senior management. The Salamander Systems team has employees that are qualified as approved trainers lecturing in NZQA standards level 1-5 in Gaming, business, food and beverage and Computing.

- ➔ Customised Software Development
- ➔ CCTV Systems/Alarms
- ➔ Gaming Stools (with option of embroidered logo).
- ➔ Call Attendant Programme

Pandora

Pandora "succeeds" KIS and VenuS and is a programme which works in conjunction with the departments EMS system to assist venues to balance their cash and hoppers on a daily and or weekly basis and complete a GMA. Pandora is a venue software solution, which is DIA compliant with the Gaming Act 2006.

Pandora imports readings straight from the site controller using the Departments EMA file. Venues check cash cleared, refills performed and cancelled credits and jackpots paid actual meter increases. Pandora then provides reports to ensure floats and hoppers are balancing. It compares the Weekly banking from the departments EMS website to the venues cash available (including hopper movement) to assist the venue with cash management.

Pandora includes:

- ✘ Daily Cash Balancing
- ✘ Daily Float Balancing
- ✘ Daily Hopper Balancing
- ✘ Weekly Hopper Reconciliation
- ✘ Weekly Banking Reconciliation
- ✘ Gaming Machine Analysis (GMA)
- ✘ Email functionality to send reports to Trust Office
- ✘ Accumulating Profit reports

Plus:

- ✘ Soft and Hard Meter Verifications
- ✘ Data Forms linked back to update meter readings and machine details
- ✘ Tip Sheets
- ✘ Training & Installation, and one month free support
- ✘ Ongoing Support Packages can be arranged

Manage your venues CASH FLOAT with the HELP of Pandora
